Buyer's Control Center

→ solutions:
Distribution Essentials
Enterprise, SX.enterprise

**Everything you need
to know to make
an intelligent
purchasing
decision**

The Buyer's Control Center provides your purchasing department with a center that allows them to make all of their purchasing decisions without having to scan through reports and jump back and forth between different screens. Once you are in the buyer's control center, everything you need to know to make an intelligent purchasing decision is right at your fingertips. Simply click and you are there. Color coding lets you instantly see possible problems that need your attention. You can set up your colors and your priority for these exceptions.

Features Include:

- Tight integration with other modules of SX.enterprise
 - buyer
 - warehouse
 - vendor
- Sort reports so that you see them in the order you need
- Drill down capability that saves you from having to open another window.

Features continued...

➔ **BUSINESS OBJECTIVES:**

Everything you need to know to make a purchasing decision is right at your fingertips.

➔ **BENEFITS:**

Use this module to give your purchasing department the ability to make all of their purchasing decisions without having to scan through reports and jump back and forth between different windows.

- Drill down to products to view surplus and adjust quantities and cost
 - drill down to ordering controls
 - drill down to usage
 - drill down to line review
 - drill down to a shopping list to view alternate vendors
- Color coding lets you can quickly see any potential problems*
- Freight consolidation lets you combine multiple purchase orders from multiple vendors to get a truckload rate
- Combine like non-stocks, specials, and/or order "as needed" products
- Combine RRARs for central purchasing
- Change vendors
- Adjust pricing based on new vendor
- Refresh RRARs
- Hyperlinks
- Easy download to Microsoft® Excel™
- Create a blank RRAR and manually add products as you need them

**Only available in SX.enterprise GUI*
