

TakeStock Data Sheet: TakeStock for Chemical

“TakeStock for Chemical provides us with a solid, reliable foundation for growth and allows us to continue to enhance our overall productivity.”

*- Todd Kroele, President
Young Chemical*

From agricultural and industrial chemicals to paints and coatings, TakeStock for Chemical provides chemical distributors with much more than just chemical-specific functionality. By incorporating solid, distribution-focused business management principles, TakeStock for Chemical, allows chemical distributors to improve service quality and enhance productivity company-wide. The result? A positive impact to their service levels and to their bottom line.

A Better Chemical Solution

At Infor, we understand the complex and unique requirements that face today's chemical distributors and blenders. We continue to incorporate new features and functionality throughout our software to accommodate these fast-changing requirements. Dedicated resources keep us up-to-date with the constant changes required by new legislation, manufacturing requirements and Responsible Distribution Process (RDP) guidelines. Now you can enable and empower your staff so they can be more responsive and informed when dealing with vendors and customers.

Finding the Balance Between Government Regulations and Making a Profit

To ensure the proper handling and safe transport of chemicals, the US government strictly regulates the chemical industry at the federal, state and local levels. TakeStock for Chemical provides specific chemical features along with distribution-centric functionality to help chemical companies navigate the maze of government regulations, documentation compliance and distribution logistics. TakeStock for Chemical can help your company find the balance between responsible business practices and making a profit.

focus on essentials

→ “TakeStock for Chemical was the solution that not only addressed chemical-specific functionality, but that also met our overall distribution needs.”

- David Baumstark

VP Operations

Archway Sales

→ “Many of these features are used everyday throughout our company and cumulatively, they bring a tremendous amount of efficiency to our operation which results in improved productivity and better customer service.

- Tom Kramer

Controller

Dar-tech, Inc.

Specific Functionality for the Chemical Industry

To protect the population and the environment, chemical distributors must meet stringent business requirements to ensure the safe handling of hazardous materials. From Certificates of Analysis and DOT compliant Bills of Lading, TakeStock for Chemical provides targeted features and functionality that allows chemical distributors to meet these important business responsibilities with reliability and efficiency.

MSDS Handling is a dependable tool for maintaining copies of MSDS documents that can be retrieved as needed to ensure consistency with government regulations.

Bill of Lading provides an effective and easy means to print DOT compliant Bills of Lading for the shipment of sales orders and warehouse transfers.

Quality Control provides the proper COA and COC documents required to track specific product characteristics by lot or to match customers with suitable lots in customer service.

Container Tracking lets you track returnable containers and provides controls to ensure the proper handling and treatment of containers to improve tracking and identification.

Vendor Rebates helps track, report and analyze an extensive array of rebate programs so you can more easily and efficiently claim rebate reimbursements from vendors.

Manufacturer’s Representative tracks and records sales order activity as well as shipments from consigned inventory, direct shipments from the manufacturer.

Vendor Consigned Inventory manages consignment of inventory through designated warehouses for both regular and manufacturer’s representative orders.

Regulatory Compliance Requirements such as SARA Title III TRI reporting will be satisfied accurately and quickly, saving the distributor a significant amount of time and money.

TakeStock for Chemical – The Right Solution

At Infor, we have the solutions, the experience, the knowledge and the partners to help you succeed in today’s dynamic chemical distribution environment. Regardless of specialty or size, if you are a chemical distributor or blender, our solutions can give you the competitive edge that you need not just to survive – but to thrive.
