

TakeStock Data Sheet: Product Overview

**“TakeStock is
indispensable in
helping us manage our
multiple warehouses
and it gives us the
flexibility to process
different pricing
schemes them.”**

*- Gino Leone, IS Manager
S. B. International*

Combining power, control and convenience, TakeStock is a robust distribution management solution specifically designed to help distributors of all types run an efficient, high-performance operation. From accounting to the warehouse, TakeStock allows distributors to enhance customer service, manage inventory levels, increase productivity and improve profitability.

Redefine Efficiency with TakeStock

Originally developed by Aperum, TakeStock boasts a full-featured distributed system and flexible, event-driven operations, running on the latest Windows®-based connectivity standards. With customizable search capabilities and quick navigation buttons, TakeStock allows users to accomplish tasks quickly and accurately. TakeStock provides a true inventory management technology that links business activities and allows distributors to maximize their resources.

Speed and Accuracy through Data Integration

Designed to maximize speed and accuracy, TakeStock can access and integrate data across an entire operation, thereby eliminating many redundant, manual processes while streamlining business functions. With its intuitive graphical user interface, users can become proficient quickly, minimizing training time and maximizing productivity. Users can be assigned to security groups with parameters specified and controlled by the administrator. Additionally, TakeStock provides flexible business rules so each distributor can personalize the software to their specific operations.

focus on essentials
